We are not fans of the hard sell. No hype, nor pressure to upgrade. In fact, we would rather not have members pay, unless they get money back in return. By funding membership fees from affiliate commissions, means that revenue is flowing, and that is what we are trying to achieve. Users naturally become members, adding more options, only if needed.

The membership fees are a worthwhile investment with high returns!

- **Downloads of various products/services.**

All users/members benefit from a repository of eBooks, software, templates and graphics. Useful tools and resources that can be incorporated into websites, presentations and product marketing. I am, because we are. Together.

The philosophy of Ubuntu Synergy implies - *I am, because we are. Together.* This appreciation motivates us to give back. Paying-it-forward is part of the process, but we can do much more. Generating residual income, not only for ourselves, but for those around us too. That's the biggest benefit of all. Success is a destination. ***This initiative is the first step of that journey!***
